

KAMALIKA BHARATHI

Aspiring Data Scientist · Machine Learning · Data Visualization & Analytics

Berlin, Germany | kamalika1191@gmail.com | [linkedin.com/in/kamalika-bharathi-k-u](https://www.linkedin.com/in/kamalika-bharathi-k-u) | github.com/kamalika1191-cloud

PROFESSIONAL SUMMARY

Aspiring Data Scientist and Master's student in Data Science with a background in Electronics & Communication Engineering and 2 years of professional experience in data analysis, reporting, and process improvement. Proficient in Python, machine learning, and data visualization, with certified expertise in Microsoft Power BI and advanced Excel. Experienced in building predictive models, deep learning pipelines, and interactive dashboards that turn raw data into clear, actionable insights. A detail-oriented analytical thinker passionate about applying machine learning and data storytelling to solve real-world problems.

CORE SKILLS

Programming & Query	Python, SQL, MySQL, HTML, CSS
Data Analysis	Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Reporting, Trend Analysis
Machine Learning	Classification Models, Predictive Modeling, Model Training & Evaluation (Accuracy, Precision), Gradient Boosting, Feature Extraction
Deep Learning	Convolutional Neural Networks (CNN), ResNet-50, Transfer Learning, Image Classification
Libraries & Frameworks	pandas, NumPy, scikit-learn, Matplotlib, Flask
BI & Visualization	Microsoft Power BI (Dashboards & Reports), Data Visualization, MS Excel (Formulas, Pivot Tables, Reporting)
Tools & Platforms	Jupyter Notebook, Git & GitHub, Microsoft Azure, SAP, PEGA
AI & Emerging Tech	Generative AI, GPT / LLMs (foundational)
Currently Learning	MLOps, Geospatial Machine Learning

PROFESSIONAL EXPERIENCE

Data Analyst — Customer Operations <i>Tata Communications, Chennai, India · Junior Customer Service Executive</i>	2023 – 2025
- Analyzed and tracked large volumes of customer case data across SAP, PEGA, and QSDB, maintaining data accuracy and consistency across multiple enterprise systems. - Built and maintained detailed reports and dashboards using MS Excel (advanced formulas and pivot tables) to monitor operational KPIs and surface data-driven insights for stakeholders. - Identified recurring workflow inefficiencies through data analysis, driving process improvements that reduced turnaround time and enhanced service quality. - Created structured documentation and trend reports to improve process transparency and support data-informed decision-making. - Collaborated across internal teams to investigate and resolve data discrepancies, ensuring reliable reporting and smooth process delivery. - Handled high-volume, deadline-driven analytical tasks with strong attention to detail and data integrity.	

KEY PROJECTS

Satellite Land-Cover Classification with Seasonal Transfer Learning <i>Python · CNN · ResNet-50 · Transfer Learning · Sentinel-1 · scikit-learn</i>	- Built a deep learning pipeline to classify land-cover types from Sentinel-1 satellite imagery, applying CNN and ResNet-50 architectures. - Used transfer learning to adapt the model across seasonal variations, improving robustness and generalization on imagery captured in different conditions. - Handled the full workflow — data preprocessing, model training, and evaluation — in Jupyter Notebook.
Machine Learning-Based Phishing URL Detection <i>Python · scikit-learn · Flask · pandas · NumPy · Gradient Boosting</i>	- Developed an end-to-end Flask web application that extracts 30 address-bar, domain, and HTML-based features from any URL. - Trained a Gradient Boosting classifier to distinguish phishing from legitimate sites, returning a real-time safety-percentage score to the user. - Designed a clean web interface allowing users to check URL safety instantly and decide whether to proceed.
Steam Games Data Visualization <i>Python · HTML · Data Visualization</i>	- Built interactive, web-based visualizations exploring Steam games data to reveal trends and patterns across the dataset. - Focused on making complex data understandable through clear, engaging visual storytelling.
Healthcare Appointment System (Cloud Deployment) <i>Microsoft Azure · Cloud Deployment · Web Development</i>	Designed and deployed a cloud-based appointment scheduling system on Microsoft Azure with separate backend and frontend components.
Diet Recommendation System <i>Python · Rule-based Logic · Machine Learning</i>	Built a recommendation system that suggests personalized diet plans based on user inputs, combining rule-based logic with data-driven techniques.

CERTIFICATIONS

Databricks Accredited Generative AI Fundamentals — Databricks Academy <i>Foundations of generative AI, large language models, and real-world GenAI applications.</i>	Jul 2024
Master in Microsoft Power BI Desktop & Service — Techademy <i>Building interactive dashboards and reports, data import, and publishing to Power BI Service.</i>	Sep 2024
Advanced Power BI Training — Techademy <i>Advanced report design and data visualization techniques in Power BI.</i>	Aug 2024
Introduction to Generative AI with GPT — LinkedIn Learning	Jul 2024
What Is Generative AI? — LinkedIn Learning	Jul 2024
World of Computer Networking — IIHT / Tata Communications Learning Academy	Dec 2023
Microsoft Excel Intermediate 2016 — IIHT / Tata Communications Learning Academy	Jun 2023
Excel 2019 Beginners Training — IIHT / Tata Communications Learning Academy	Jun 2023

EDUCATION

M.Sc. Data Science <i>University of Europe for Applied Sciences, Berlin</i>	2025 – Present
B.E. Electronics & Communication Engineering <i>Animalar Engineering College, India · GPA: 8.79</i>	2019 – 2023

LANGUAGES

English (Fluent) · German (B1/B2, improving) · Tamil (Native)
